Meekatharra Gold Operations Update

Westgold Resources Limited (**ASX:WGX**) (**Westgold**) wishes to advise that a routine processing plant maintenance shut at its Meekatharra Gold Operations (**MGO**) has discovered issues with the white metal bearings on the SAG mill. While fitting a replacement bearing further issues were encountered. As a consequence the Bluebird Processing Plant at MGO has now been offline for five days with an expectation that it may take a further 24-48 hours for the matter to be rectified.

This unexpected incident is likely to result in a process loss of one week in the current quarter and an estimated 2,500 ounces shortfall in output from MGO.
