Ore Reserves and Mineral Resources

This presentation refers to Westgold having a combined Ore Reserve and Mineral Resource estimate of 13.2Moz and 3.3Moz (respectively) and refers to the individual Ore Reserve (or Mineral Reserve) and Mineral Resource estimate of Westgold.

The information in this presentation that relates to the Ore Reserves and Mineral Resources of Westgold has been extracted from the ASX announcement titled "Westgold 2024 Mineral Resources and Ore Reserves" released to the ASX on 16 September 2024 and available at www.asx.com.au. The Company confirms that it has since published updates to its Starlight Mineral Resource (Refer ASX Release "Starlight Mineral Resource Grows by 91%" of 13 November 2024); and its Bluebird-South Junction Mineral Resource (Refer ASX Release "Bluebird-South Junction Mineral Resource Grows to 1.4Moz" of 18 November 2024.) The Company advises that its Mineral Resource Statement as published on 16 September 2024 has not been updated to reflect the growth in the Mineral Resource Estimate for Starlight, nor for Bluebird-South Junction.

This presentation contains references to estimates of Mineral Resources and Ore Reserves. The estimation of Mineral Resources is inherently uncertain and involves subjective judgments about many relevant factors. Mineral Resources that are not Ore Reserves do not have demonstrated economic viability. The accuracy of any such estimates is a function of the quantity and quality of available data, and of the assumptions made and judgments used in engineering and geological interpretation, which may prove to be unreliable and depend, to a certain extent, upon the analysis of drilling results and statistical inferences that may ultimately prove to be inaccurate. Mineral Resource estimates may require re-estimation based on, among other things: (i) fluctuations in the price of gold; (ii) results of drilling; (iii) results of metallurgical testing, process and other studies; (iv) changes to proposed mine plans; (v) the evaluation of mine plans subsequent to the date of any estimates; and (vi) the possible failure to receive required permits, approvals and licenses.

The information in this presentation that relates to Westgold's Exploration results and Mineral Resource Estimates is compiled by Westgold technical employees and contractors under the supervision of Mr. Jake Russell B.Sc. (Hons), who is a member of the Australian Institute of Geoscientists and who has verified, reviewed and approved such information. Mr Russell is a full-time employee of Westgold and has sufficient experience which is relevant to the styles of mineralisation and types of deposit under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the Joint Ore Reserves Committee's 2012 Australasian Code for Reporting of Mineral Resources and Ore Reserves (**JORC Code**) and as a Qualified Person as defined in the CIM Guidelines and NI 43-101. Mr. Russell is a full-time employee as General Manager – Technical Services of Westgold and, accordingly, is not independent for purposes of NI 43-101. Mr Russell consents to and approves of the inclusion in this presentation of the matters based on his information in the form and context in which it appears. Mr Russell is eligible to participate in short and long-term incentive plans of Westgold.

The information in this presentation that relates to Westgold's Ore Reserve is based on information compiled by Mr. Leigh Devlin B.Eng. FAusIMM and who has verified, reviewed and approved such information. Mr. Devlin has sufficient experience which is relevant to the styles of mineralisation and types of deposit under consideration and to the activities which they are undertaking to qualify as a Competent Person as defined in the JORC Code and as a Qualified Person as defined in the CIM Guidelines and NI 43-101. JORC Code

It is a requirement of the ASX Listing Rules that the reporting of Ore Reserves and Mineral Resources in Australia comply with the JORC Code.
